ABOUT ME

I am a creative and hardworking web developer seeking for the most challenging code scenarios in order to level up my product and delivery awesome reusable, easy to learn and maintain software.

EDUCATION

Multimedia Arts

2021 | Universidad Nacional del Arte

Web development

2019 | Digital House

EXPERIENCE

Integrations Developer

Avature | April 2021 - January 2022

-Development and maintenance of integrations between ATS and CRM systems for multinational corporations.

Full Stack Web Developer

Aper | August 2019 - April 2021

- I participated in the development of different e-commerce sites for bank entities of all LATAM.

-Maintained and built new features based on customer's requests using multiple technologies and frameworks (mainly Vuejs, ES6 vanilla, SCSS, JQuery and PHP) and integrated them into Prestashop CMS.

-Worked in a feature responsible for decrypting and authenticating user's data sent by the bank within a JWT through an API call.

-Designed and developed by my own an entire module that allows the sales team to configure and manage all the home page components such as carousels, banners and collections directly from the shop's backoffice. This module was implemented in all company's projects.

- I was in charge of delivering speeches about design patterns to my coworkers.
